

**STATEMENT OF WORK**  
**Stream Habitat Improvement and Management (395)**  
**Michigan**

**These deliverables apply to this individual practice. For other planned practice deliverables, refer to those specific Statements of Work.**

---

**DESIGN****Deliverables:**

1. Design documentation that will demonstrate that the criteria in NRCS practice standard have been met and are compatible with other planned and applied practices.
2. Practice purpose(s) as identified in the conservation plan.
3. List of required permits to be obtained by the client.
4. List of facilitating practices.
5. Practice standard criteria-related inventories and analyses to develop stream habitat management plans and specifications including, but not limited to:
  - a. Resource inventories
  - b. Identification of wildlife targeted species
  - c. Lunker Structures for Fish: Michigan Conservation Sheet 395a
  - d. NRCS Stream Corridor Restoration Handbook
  - e. National Engineering Field Handbook Chapter 16: Streambank and Shoreline Protection
6. Operation and maintenance plan.
7. Written plans and specifications including sketches and drawings shall be provided to the client that adequately describe the requirements to install the practice and obtain necessary permits including compliance with MI Cultural Resources Policy.
8. Certifications that the design meets practice standard criteria and comply with applicable laws and regulations.
9. Design modifications during installation as required.

---

**INSTALLATION****Deliverables**

1. Pre-application conference with client.
2. Verification that client has obtained required permits.
3. Application assistance.
4. Facilitate and implement required management plan modifications with client and original designer.
5. Certification that the application process meets the management plan and permit requirements.
6. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws, regulations and NRCS policies during installation.
7. Certification that the application process and materials meet design and permit requirements as required in MI eFOTG, Section IV, Stream Habitat Improvement and Management, Plans and Specifications subsection.

---

**CHECK OUT****Deliverables**

1. Records of application.
  - a. Extent of practice units applied
2. Certification that the installation meets NRCS standards and specifications and is in compliance with permits.
3. Progress reporting.
